Project Management – The three option model

There is no set route to working with an organisation or a project team. For many of our clients we develop something specific to meet their internal needs. There are however three options we have found useful for helping to develop the project management knowledge and skills of participants. These are listed below.

Options & Benefits

	Attend Perfect Project event ①	Receive free E Course②	Receive Deliver That Project③	One Day follow up④	Receive 2 coaching sessions⑤
Option 1	*	*			
Option 2	*	*	*	*	
Option 3	*	*	*		*

Benefits	Option 1	Option2	Option3
Participants from the same organisation learn together	*	*	*
All those who participate can apply a project management methodology to their projects upon their return to work	*	*	*
All those who attend use a common language and a common way of working on a project	*	*	*
They can use appropriate parts of the methodology suitably amended to suit the needs of their project	*	*	*
They will have the skills and knowledge to start to deliver a project	*	*	*
They get to use and access a wide range of project management templates	*	*	*
They receive an extra support day where they can obtain more tutor input ④		*	*
It allows participants to go back to their action plan and get extra support / advice or provide insights for others		*	*
The one day follow up will act as a catalyst for action with participants having to report back on successes and issues		*	*
The coaching provides them with the opportunity to focus on delivery of a specific project			*
They have the opportunity to raise issues with their coach during each coaching call as well as e mail support			*
The learning process is enhanced by coaching			*
The chances of delivering a specific project are enhanced by one to one coaching			*

Notes:

- ① This is a 2 day programme and you can see an outline at <http://www.ronrosenhead.co.uk/wp-content/perfect-project-jis5.pdf>
- ② The free e-course is a series of emails sent directly to the persons in box. The emails are a mix of education, information and training with some suggested activities to undertake
- ③ Deliver That Project is a practical step by step training guide which takes an individual from an initial idea to delivery. Go to www.deliverthatproject.com/main.html for more information. The e-book is sent by email to all participants
- ④ The one day workshop covers a number of areas:
 - looking at queries from the 2 day Perfect Project event
 - application of the course to actual projects - group and individual work
 - helping to develop individual plans around a specific project
 - holding individual clinics

We usually build the content of the day around the needs of the group

- ⑤ Coaching is an excellent way of further developing the knowledge and skills of those attending The Perfect Project event. The sessions are conducted by telephone and focus on individual needs identified on the 2 day event
